

Get Excited And Make Things!

The Rogue Hack Lab is a hackerspace in downtown Medford, Oregon. We are non-profit, community-operated, 24-hour space and infrastructure provider for technical and creative projects and events. We opened in October 2012.

Membership in the Rogue Hack Lab is open to anyone, for a sliding-scale monthly fee. Many of our events are also open to non-members.

A hackerspace, or makerspace, is a place where people who like making new things and exploring how old ones work can work, play, learn, experiment and collaborate. Hackerspaces are all over the world: as nearby as Eugene or Portland, and as far away as Tokyo or Berlin.

Come join in!

Open hack Wednesdays 6:30pm - 9:30pm
